2026 NFHS Basketball Rules Changes

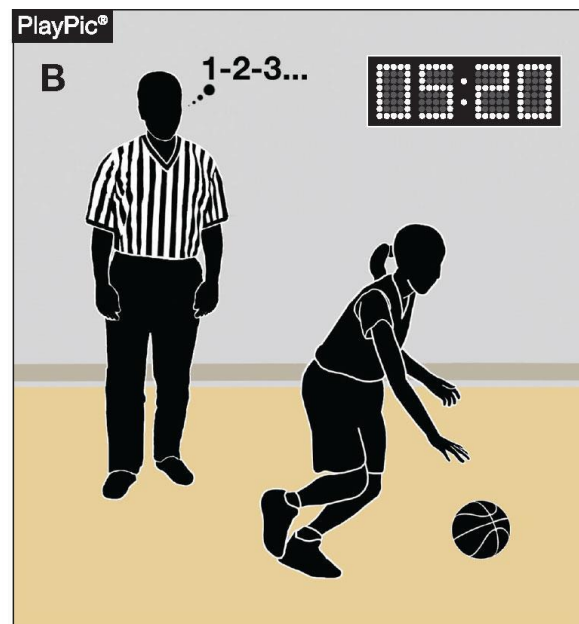

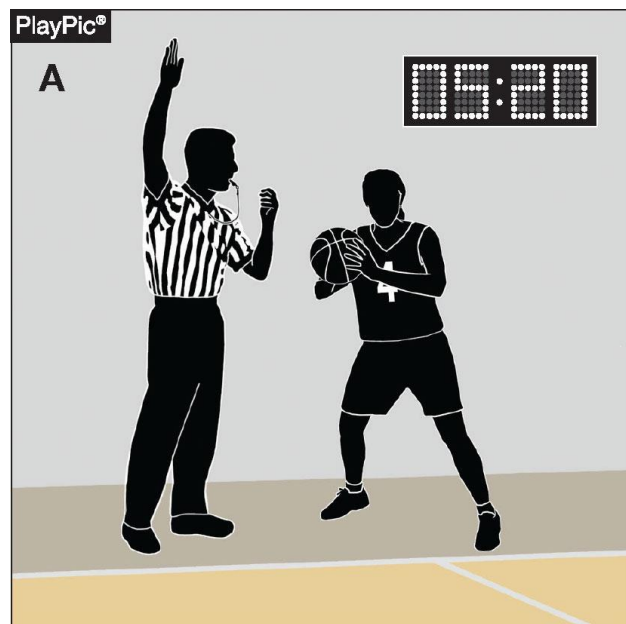

RE-STARTING THE CLOCK 5-9-5 (NEW)

- In the last 59.9 seconds of each quarter or extra period, if play is to be resumed by a throw-in or an unsuccessful free throw, a minimum of 3/10ths (.3) of a second must expire on the game clock when the ball is legally touched by a player inbounds

TIMING MISTAKES

5-10-2 NOTE (NEW)

- If the referee determines the clock malfunctioned or was not started/stopped properly, or if the clock did not run, an official's count, **visible or silent**, or other official information may be used to make a correction

ALTERNATING POSSESSION

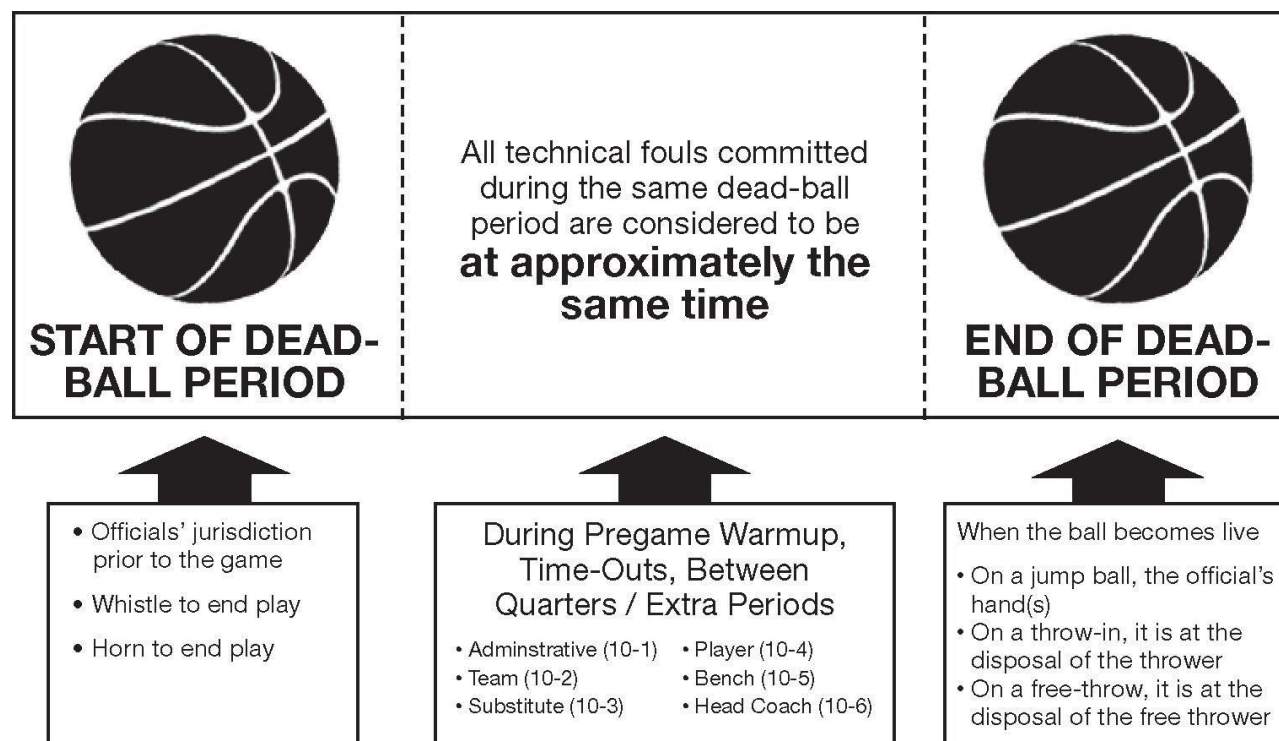

6-4-4g

- The letter 'g' is now eliminated
- Play is stopped when there is team control, a goal is scored, or another official stoppage occurs. When play is properly stopped, the ensuing resumption is administered under the appropriate rule for the situation, rather than using the alternating possession procedure (Rule 4-36-2.c)
- This is not a rule change; this was inadvertently left in the rule after the rule change in 2025-26

RESUMING PLAY DIFFERENCES

8-6-4a-d (NEW)

- All technical fouls committed during the same dead-ball period are considered to be at approximately the same time for purposes of offsetting their penalties
- Play resumes at the point of interruption

RESUMING PLAY DIFFERENCES

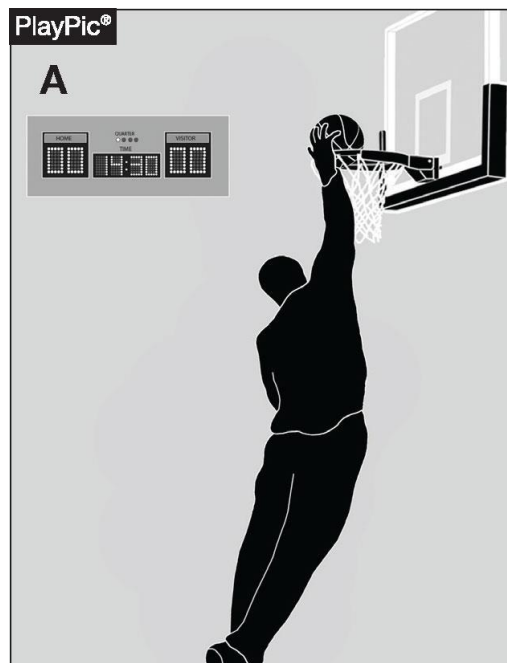

8-6-4a-d (NEW)

ART 4...When, during the same dead-ball period that follows an infraction or stoppage in play and before the ball becomes live, both teams are assessed technical fouls:

- a. All technical fouls are considered to have been committed at approximately the same time for the purposes of offsetting their penalties;
- b. All fouls are charged, and their penalties are identified;
- c. When there is an unequal number of fouls committed during the dead-ball period, play shall resume as if the last committed single administrative, team, substitute, player, or bench technical foul was the only foul committed; and
- d. If, after the cancellation of the penalties for an equal number of fouls by both teams, the game shall be resumed at the point of interruption.

RESUMING PLAY DIFFERENCES

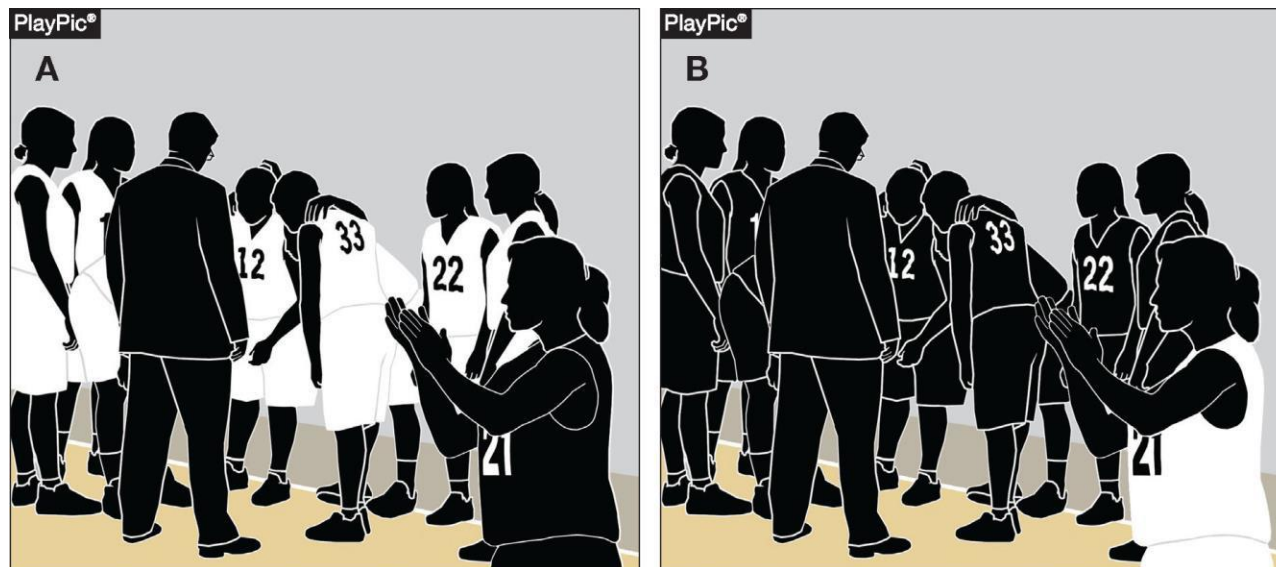

8-6-4a-d (NEW)

- While (A) and (B) occur more than 13 minutes apart in the pregame warmup, they are considered to be at approximately the same time for purposes of offsetting their penalties

RESUMING PLAY DIFFERENCES

8-6-4a-d (NEW)

- Even though the unsporting technical fouls are committed at the start (A) and end (B) of the time-out, they are considered to be at approximately the same time for purposes of offsetting their penalties

THROW-IN PROVISIONS

9-2 (PENALTY)

THROW-IN VIOLATIONS: WHERE DO WE GO?

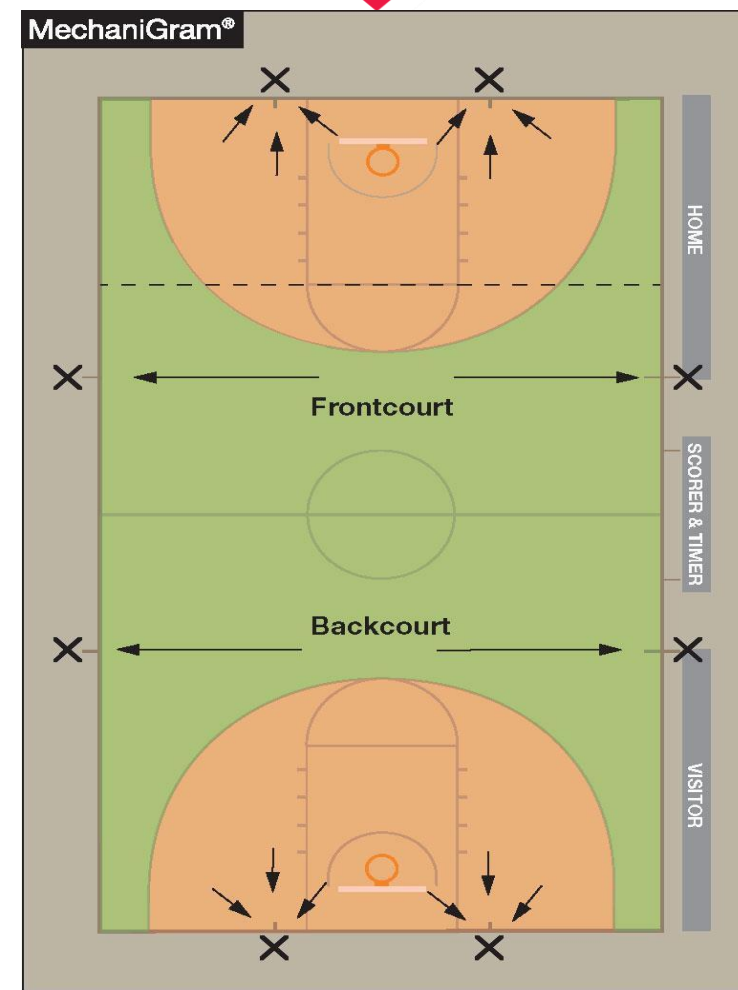

Violation during the throw-in?

Start with the original throw-in location.

Not one of the 8 designated spots?

Move to the appropriate designated spot.

Exception: Division-line throw-ins stay at the division line.

- If the dunk attempt is successful, the ball becomes dead when it passes through the basket; any subsequent contact between the player who dunked the ball and an opponent shall be ignored unless the contact is ruled intentional or flagrant
- If the dunk attempt is unsuccessful and the ball remains live, any illegal contact between the player who attempted the dunk and an opponent shall be ruled a common foul and administered according to the bonus situation

BASKET INTERFERENCE

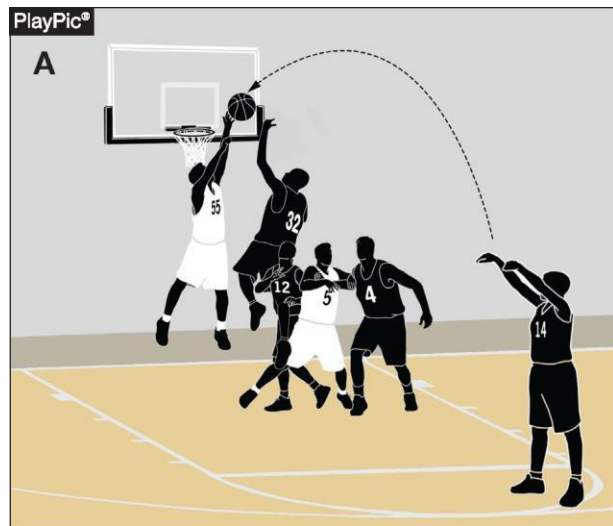

4-6-2

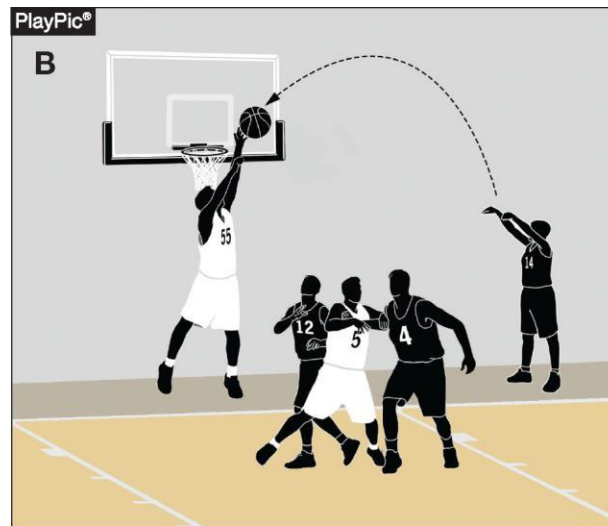

- Occurs when a player slaps or strikes the backboard, causing the backboard or ring to vibrate during a try for goal that has the **possibility of entering the basket**
